1. ***Group***:
    a. Group name: Vikings Creed
    b. Members:
        i. James Peterson
        ii. Sam Tucker
        iii. Milad Masoodi
        iv. Selahaddin Turkoglu
        v. Vitky Thao
2. Sprint PBI's
    a. As an instructor, I want to be able to assign TAs to lab sections, so that TAs can see which lab section they are assigned to.
    b. As a Supervisor, I want to assign TA's to particular lab sections, so that TAs that know certain instructors can work together
    c. As a Supervisor, I want to be able to create lab sections, so that the TAs can be assigned to a particular section
    d. As an instructor, I would like to view TA assignments, so I can determine if I need to hire an additional TA.
    e. As a Supervisor, I want to manage accounts, so that I can reassign instructors and TAs to courses.
    f. As a Supervisor, I want to be able to assign TA's to courses, so that TA's can see which course they are assigned to
    g. As a Supervisor, I want to be able to assign instructors to courses, so that I can track which instructor is instructed to which course.
    h. As a Supervisor, I want to be able to edit accounts so that I can correct errors and republish them
    i. As a Supervisor, I want to be able to delete accounts so that I can remove my information from the system
    j. As a Supervisor, I want to create courses, so that I can create the classes for the upcoming semester.
    k. As a Supervisor, I want to create accounts, so TAs and Instructors can have accounts.
    l. As a User, I must be able to login, so that I can use the application

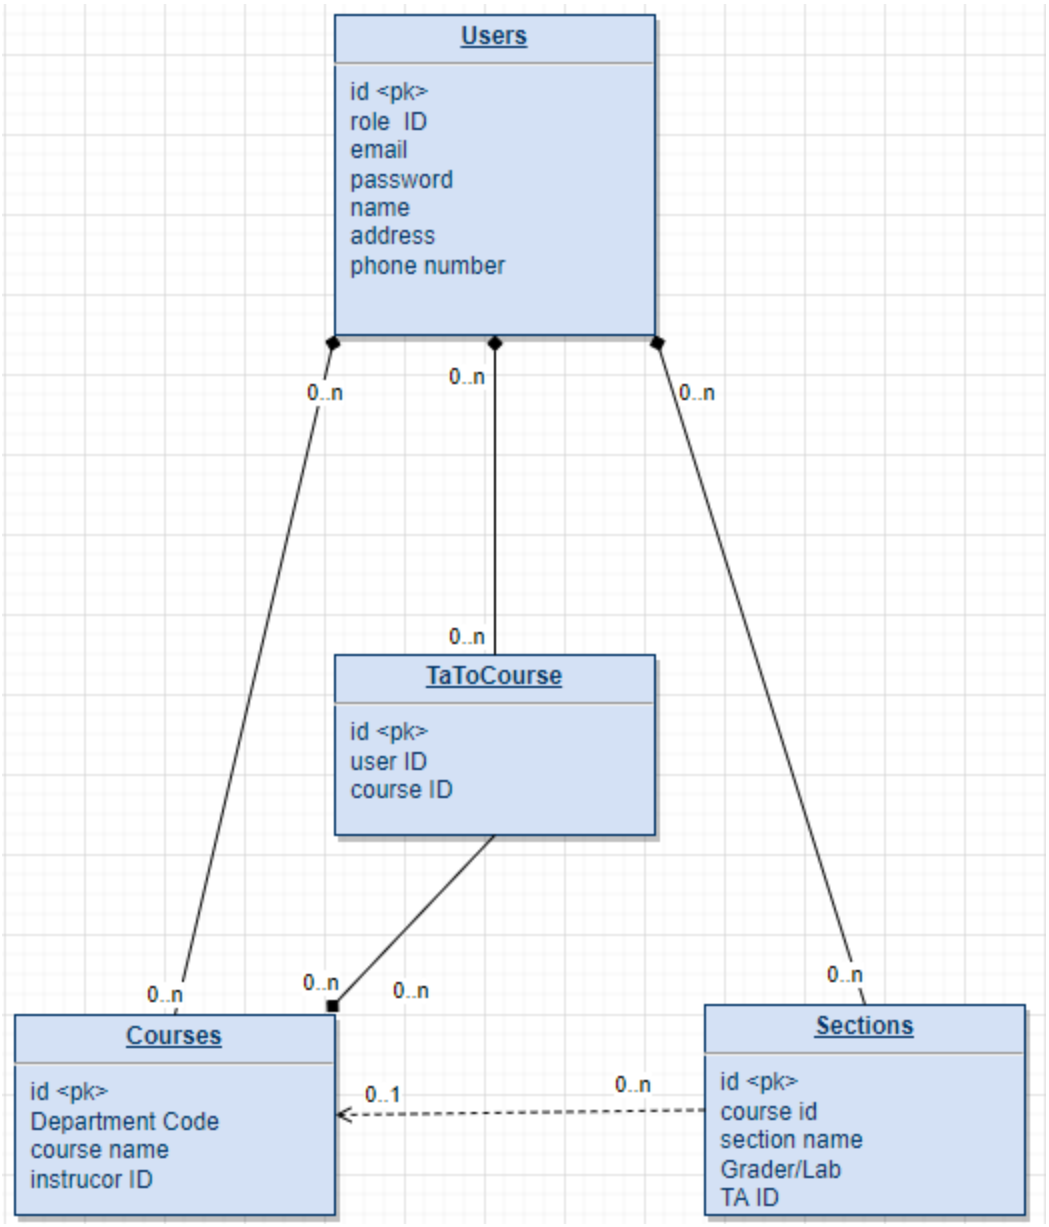
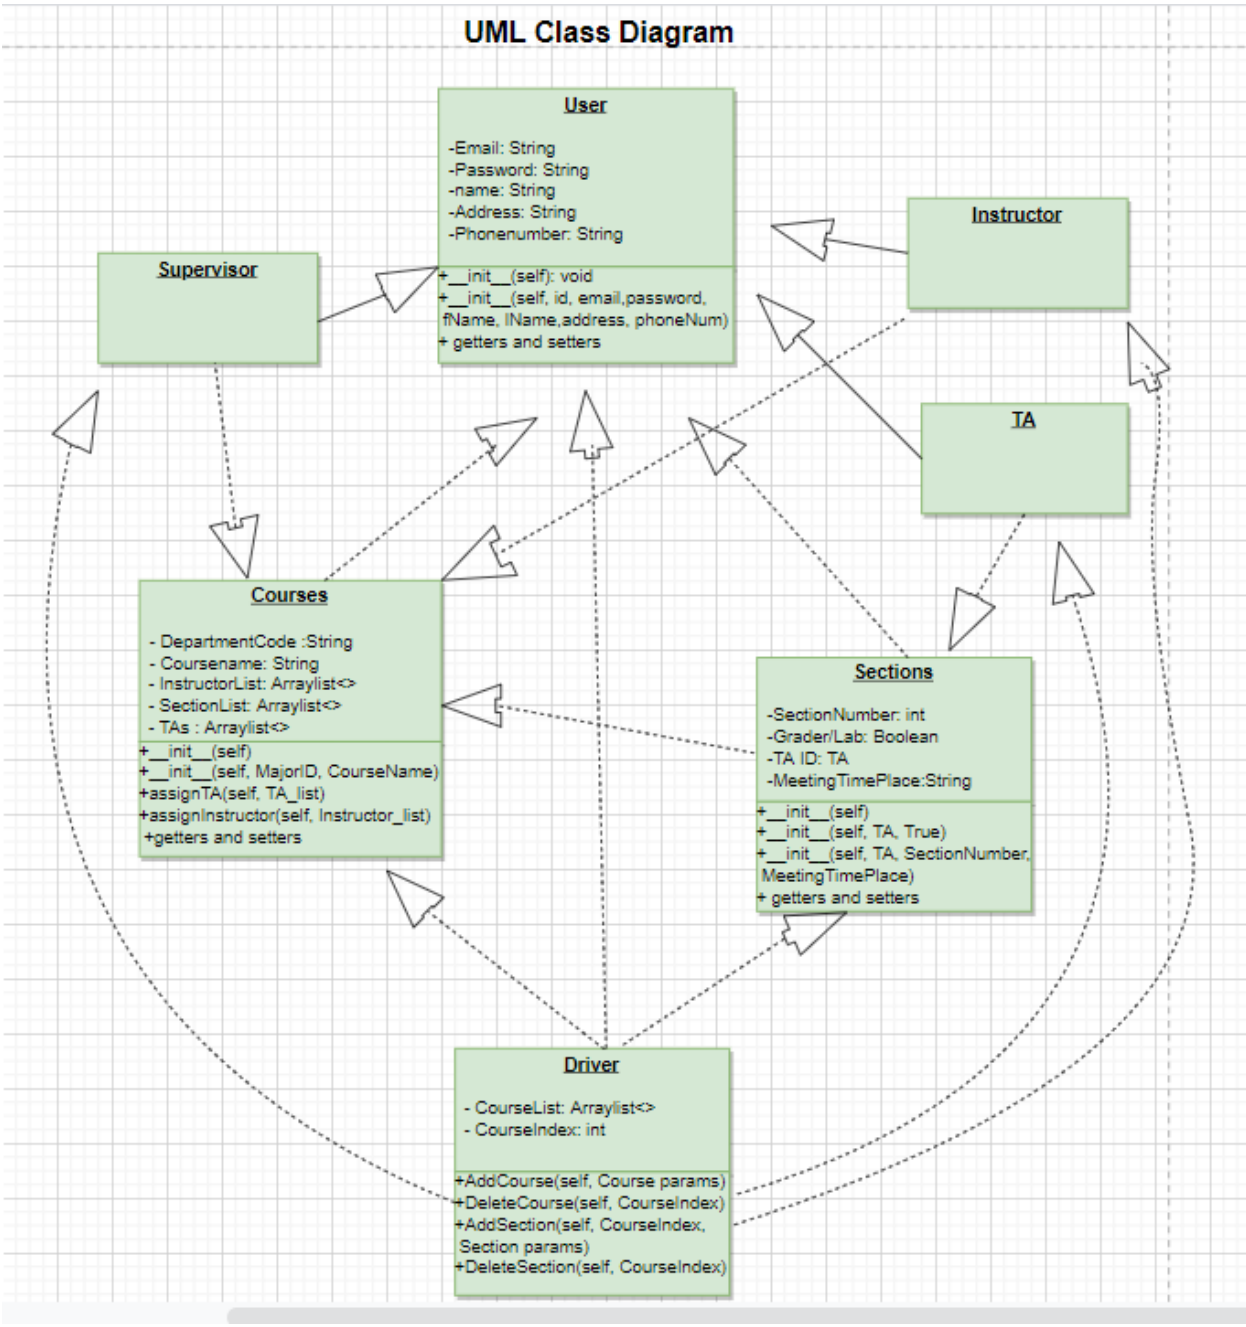
c. Database Design



4. Low Level Design
    a. Class Diagram



-

Method description ----------

Driver class:

- Driver
  - courseList: ArrayList<Course>
  - accountList: ArrayList<User>
  - currentAccount: User or *None* singleton
  - __init__(self)
    - Precondition: database valid and accessible
    - Postcondition: fills in accountList and courseList

        - Side effect: fetches and fills in data from database into accountList and courseList with helper methods, fillAccounts and fillCourses, sets currentAccount to None
    - Called first -> fillAccounts(self) - constructs Supervisor, Instructor, and TA, from database, and adds them to accountList SKIPS Courses instance var
    - Called second -> fillCourses(self) - constructs Courses and their Sections, from database, and adds them to courseList, adds each Course to corresponding Instructor and TA's "Courses" instance var
    - AddCourse(self, CourseID, CourseName) - uses course constructor, adds course object to course list, adds to database
        - Precondition: All fields passed in are valid data types
        - Postcondition: Adds a course using the course specifying constructor
        - Side effect: Course may be created with null fields.
        - Parameter CourseID: String
        - Parameter CourseName: String
    - DeleteCourse(self, CourseIndex) deletes in database, removes from CourseList
        - Precondition: The course ID being passed in is of the correct data type
        - Postcondition: Deletes course with matching ID from the database
        - Side effect: Course may not exist, an error will be printed when trying to delete nonexistent course
        - Parameter CourseIndex: Int
    - LogIn(self, email, password) - looks for matching email in accountList, then checks if password also matches, if both match sets currentAccount to that User, returns 0, 1, or 2 if no matching email, matching email, but not password, both match
        - Precondition: currentAccount is None
        - Postcondition: returns 0, 1, or 2 if no matching email, matching email, but not password, both match
        - Side effect: if both match currentAccount is set to matching User
        - Parameter email: String
        - Parameter password: String
    - AddAccount(self, userParams) - constructs and adds the account to accountList, and adds to the database
    - DeleteAccount(self, AccountIndex) - deletes the account from database and accountList

Class:

- Supervisor(User)
- Instructor(User)
    - Instructor Parameter Courses: ArrayList<Course>
- TA(User)
    - TA Parameter Courses: ArrayList<Course>
- Course

- __init__(self)
  - Precondition: None
  - Postcondition: A section is created with the given information
  - Side effect: None
- __init__(self, CourseID, CourseName)
  - Precondition: All fields passed in are valid data types
  - Postcondition: A section is created with the given information
  - Side effect: None
  - Parameter CourseID: int
  - Parameter CourseName: String
- assignTA(self, TA_list)
  - Precondition: The list passed in contains TA objects
  - Postcondition: A list of TAs are assigned to a section
  - Side effect: None
  - Parameter TA_list: ArrayList<User> (list of users)
- assignInstructor(self, InstructorID)
  - Precondition: The ID passed in a valid data type
  - Postcondition: A list of Instructors are assigned to a section
  - Side effect: None
  - Parameter Instructor_list: ArrayList<User> (list of users)
- AddSection(self, CourseNum, TA, SectionNum, meetingInfo)
  - Precondition: All fields passed in are valid data types
  - Postcondition: A section is added to the specified class with the specified information
  - Side effect: A section may already exist in that class with the same information
  - Parameter CourseNum: int
  - Parameter TA: TA
  - Parameter SectionNum: Int from section
  - Parameter meetingInfo: String from section
- DeleteSection(self, sectionNum) Deletes from course, deletes from database
  - Precondition: All fields passed in are valid data types
  - Postcondition: The section with the corresponding section number in the corresponding class is deleted from the database
  - Side effect: May try to delete nothing and throw and error causing the program to crash
  - Parameter sectionNum: int from section
- Course Parameter CourseID: int
- Course Parameter CourseName: String
- Course Parameter InstructorID: int
- Course Parameter SectionList: list of ints
- Course Parameter TA_list: list of TA objects
- getters/setters: accesses and modifies data within user

        - Precondition: The course account passed in must already have been created
- Section
    - __init__(self)
        - Precondition: None
        - Postcondition: A blank section is created with all data empty
        - Side effect: None
    - __init__(self, TA, isGrader)
        - Precondition: All fields passed in are valid data types
        - Postcondition: A section is created with a TA assigned and boolean set to true
        - Side effect: None
        - Parameter TA: TA
        - Parameter isGrader: boolean
    - __init__(self, TA, sectionNum, meetingInfo)
        - Precondition: All fields passed in are valid data types
        - Postcondition: A section is created with the given information
        - Side effect: None
        - Parameter TA: TA
        - Parameter SectionNum: int
        - Parameter meetingInfo: String
    - Section Parameter TA: TA
    - Section Parameter courseNum: int
    - Section Parameter isGrader: boolean
    - Section Parameter sectionNum: int
    - Section Parameter meetingInfo: String
    - getters/setters: accesses and modifies data within user
        - Precondition: The course account passed in must already have been created

5. User
    a. __init__(self, id, email, password, name, address, phoneNum)
        i. Precondition: All fields passed in are valid data types
        ii. Postcondition: A new user is created with the specified information stored in their account
        iii. Side effect: None
        iv. Parameter Id: int
        v. Parameter Email: string
        vi. Parameter Password: string
        vii. Parameter Name: string
        viii. Parameter address: string
        ix. Parameter phoneNum: string
    b. getters/setters: accesses and modifies data within user
        i. Precondition: The course account passed in must already have been created

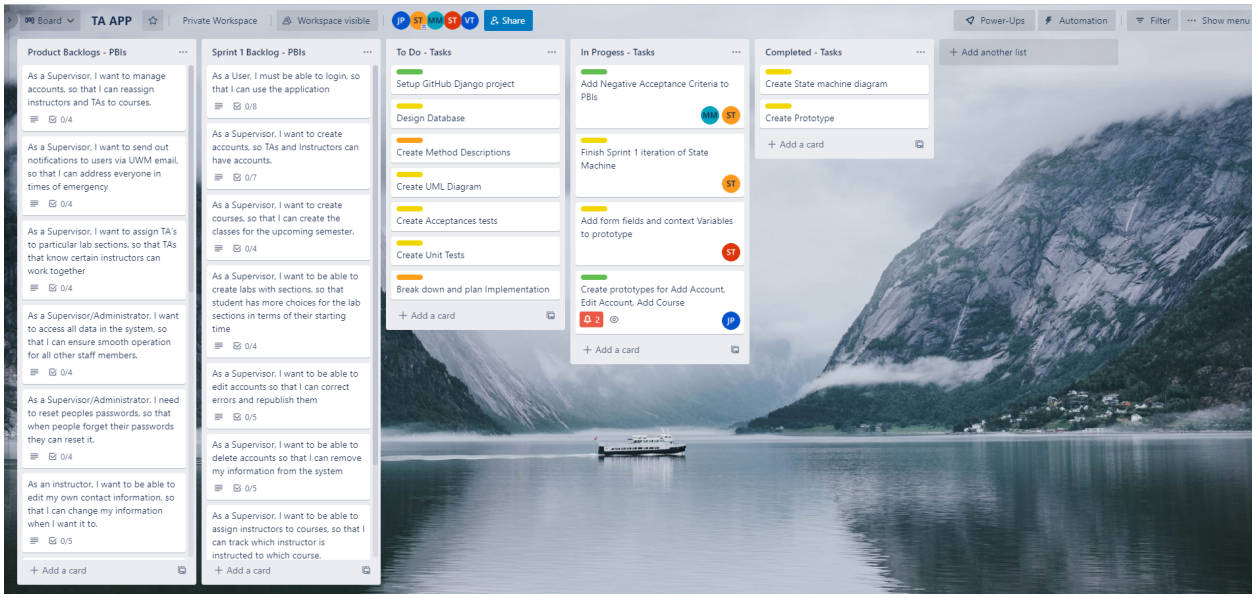
6. Scrum Minutes ——

    a. Scrum minutes: for each scrum meeting include
        i. date and time of meeting, and who attended
        ii. answers to the 3 questions for each attending member
        iii. list of tasks deemed completed, who completed them
        iv. list of new tasks generated, who volunteered for them
        v. screenshot of the trello task board after the meeting

    - 3 Questions:
        - What you finished
        - What you are doing
        - What are is impeding you

4/13/2022 : 1 hour: 45min

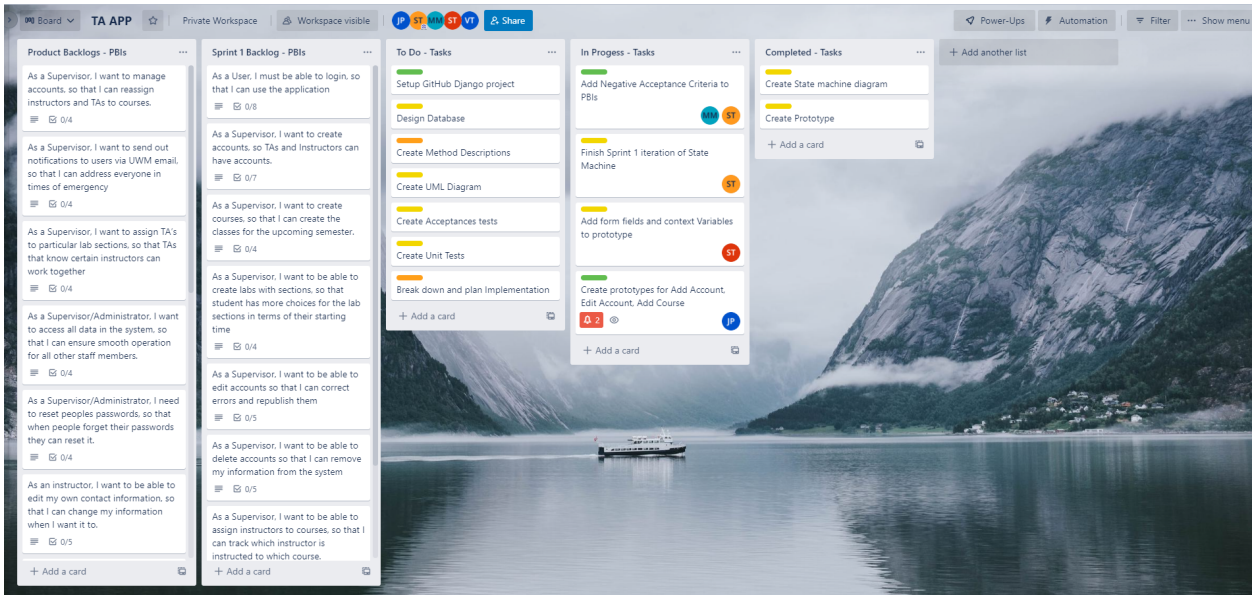
- 1. 4/13 5pm - 6:45pm everyone attended
- 2. 3: Questions:
    a. Sam
        i. Prototype and state machine diagram
        ii. Negative acceptance criteria, finish sprint 1 prototype
        iii. Awaiting overall design being finished
    b. Milad
        i. Prototype and state machine diagram
        ii. Negative acceptance criteria
        iii. Awaiting overall design being finished
    c. Selahaddin
        i. Prototype and state machine diagram
        ii. Add form fields, and context variables,
        iii. Awaiting overall design being finished
    d. Vitky
        i. Prototype and state machine diagram
        ii. Grab tasks out of queue
        iii. Awaiting overall design being finished
    e. Jamie
        i. Prototype and state machine diagram
        ii. Finish sprint 1 prototype
        iii. Awaiting overall design being finished
- 3. State machine diagram, protype in progress
- 4. Additions to the state machine diagram
- 5.



4/14/2022 :

- 1. 10 minutes, James was the only one not there
- 2. 3: Questions:
    a. Sam
        i. I set up GitHub with PyCharm and started first iteration of State machine
        ii. I will start the state machine and database design
        iii. No Blockers
    b. Milad
        i. I worked on high design with group members
        ii. I will start working on tasks which is adding negative acceptance criteria to the Trello board
        iii. No blockers
    c. Selahaddin
        i. I will help the team with high design
        ii. I will start working on my task which adding form fields to the prototype
        iii. No Blockers
    d. Vitky
        i. I worked high level design State machine diagram and prototype with group
        ii. I will start working on negative acceptance criteria
        iii. No Blockers
- 3. No tasks completed just planning
- 4. Added tasks to trello board and assigned members to them

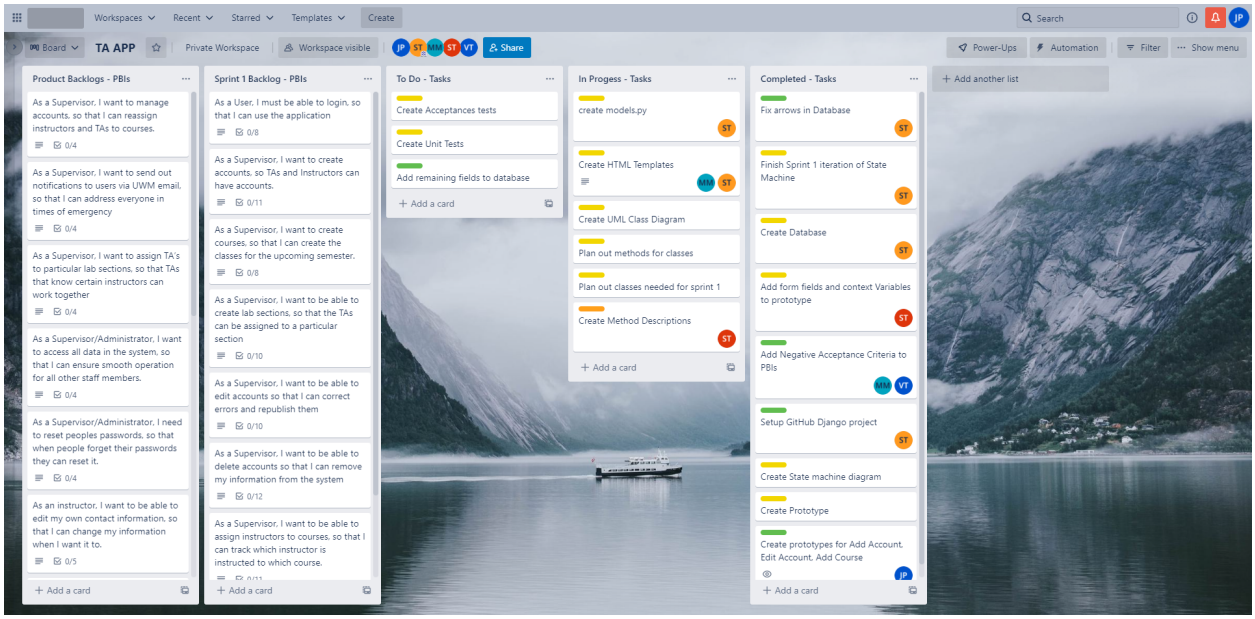
- 5.



4/18/2022 :

- 1. 5pm-7pm Everyone attended
- 2. 3: Questions:
    a. Sam
        i. Created Database diagram, Finalized State machine
        ii. HTML Templates, start Models.py
        iii. No blockers
    b. Milad
        i. Filled out and edited negative acceptance criteria
        ii. Will do templates for login home and accounts
        iii. None
    c. Selahaddin
        i. Finished adding context variables to prototype
        ii. Will be working on adding method descriptions to design document
        iii. No blockers
    d. Vitky
        i. Finished negative acceptance criteria and asked for checking/editing
        ii. Will be working on database to understand and I'll grab tasks out of queue
        iii. No blockers
    e. Jamie
        i. Finished prototype rough draft
        ii. Will be working on templates
        iii. No blockers
- 3.state machine diagram(Everyone worked together to complete),

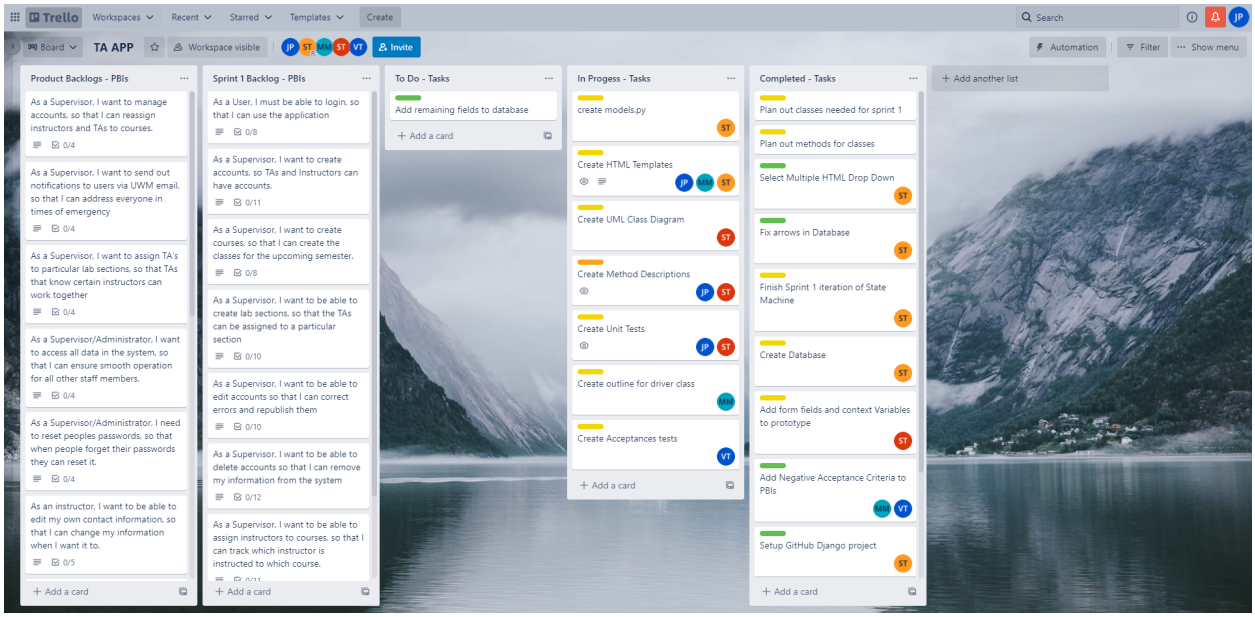
- 4. list of new tasks generated, who volunteered for them
- 5.



4/20/2022 :

- 1. 5pm-7pm everyone attended
- 2. 3: Questions:
    a. Sam
        i. Worked on HTML Templates
        ii. On UML Diagram, Finish HTML Templates with Tables
        iii. No Blockers
    b. Milad
        i. User class skeleton, supervisor skeleton, started driver outlines
        ii. Finish driver outlines, add assigned templates
        iii. none
    c. Selahaddin
        i. Worked on some of the method descriptions
        ii. Will finish the class diagram and start unit tests
        iii. None
    d. Vitky
        i. Fill in some code in Project including admin.py and model.py.
        ii. Will finish the acceptance tests to pass from using model.py
        iii. None
    e. Jamie
        i. Wrote HTML for my templates
        ii. Finishing my templates and completing unit tests
        iii. None

- 3. Planning for the weekend and assigning everyone tasks
- 4. Assigned acceptance testing to specific, same with unit tests, templates, users, and supervisor file.
- 5.

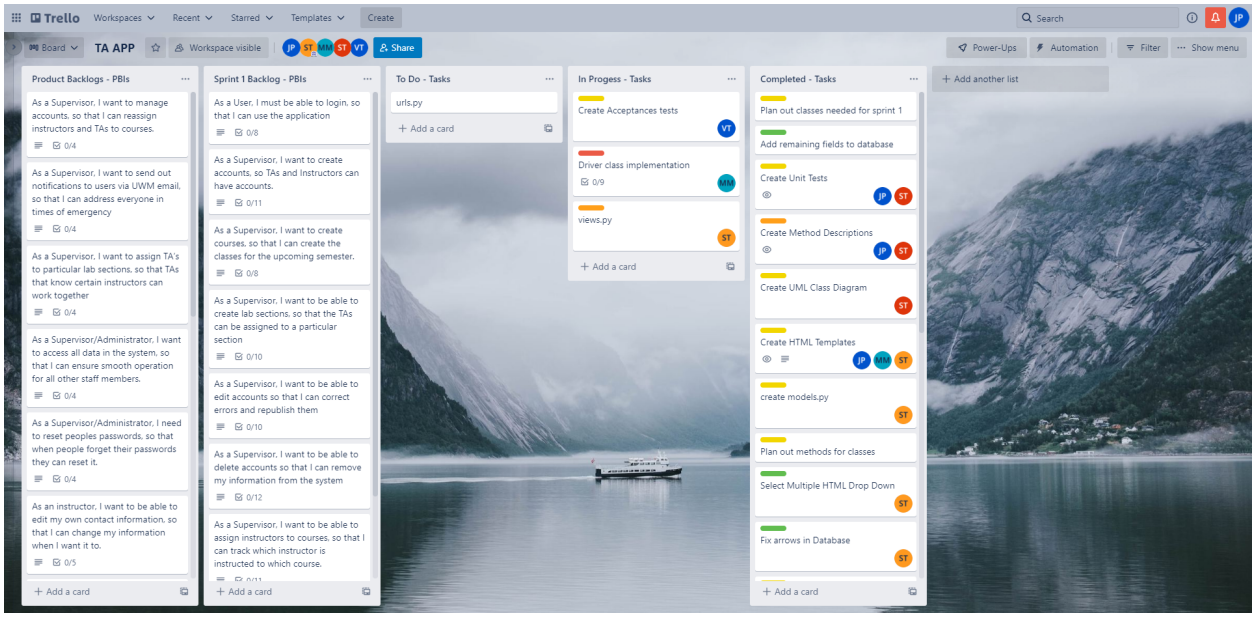


4/25/2022 :

- 1. 5pm- Vitky was the only person unable to attend, the rest were present
- 2. 3: Questions:
    a. Sam
        i. Worked on Model.py
        ii. Will work on urls.py and views.py
        iii. none
    b. Milad
        i. Did three templates, user skeleton, supervisor, Driver outline
        ii. Driver?
        iii. none
    c. Selahaddin
        i. Did the unit tests for User and driver classes and UML class diagram
        ii. Acceptance tests
        iii. none
    d. Vitky
        i. Plan out classes needed for sprint 1
        ii. Will message my team for update.
        iii. None
    e. Jamie

i. Finished 2 templates, 2 unit tests and the classes they are testing, and created the skeletons for TA and instructor
ii. Finishing touches on my 2 unit tests, and getting view.py to work
iii. Views.py

- 3. Jamie and Selahaddin completed the unit tests. Vitky and Selahaddin completed the acceptance tests. Sam completes the model.py, and milad completed the driver class
- 4. None, just getting ready to present and fixing bugs
- 5.



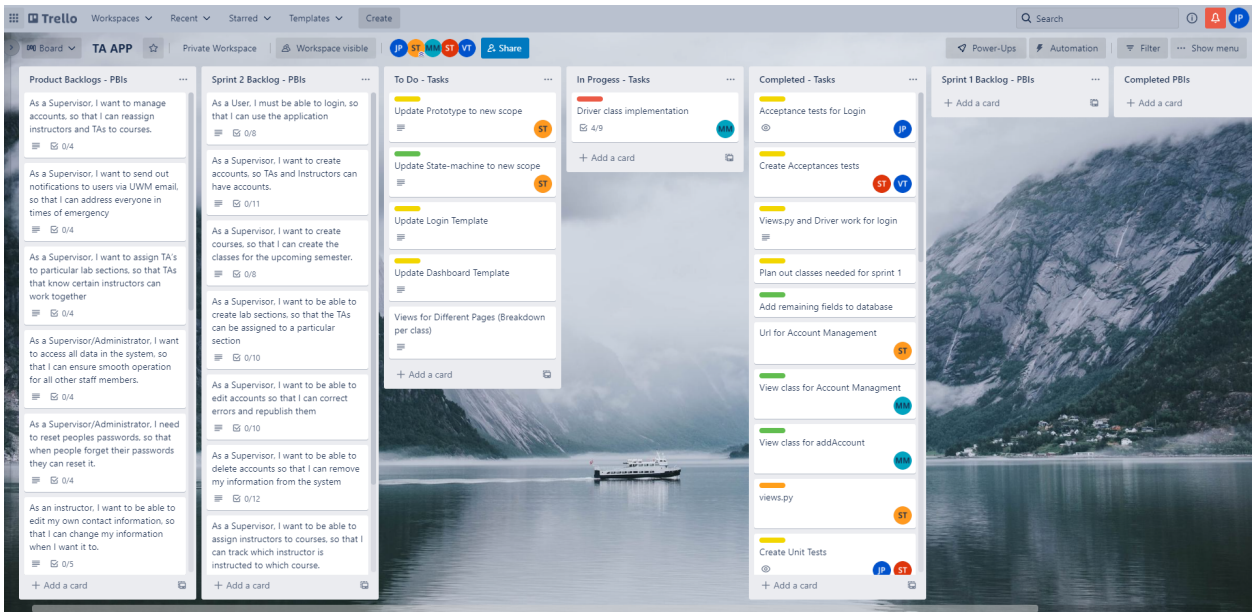
4/26/2022 :

- 1. 5pm-6pm everyone was in attendance
- 2. 3: Questions:
  a. Sam
    i. I worked on Views for Login and setup Templates for Request
    ii. Tonight I will help with Account Management to display accounts in database, I will also update Prototypes and State Machine
    iii. Possible SQLite mishaps
  b. Milad
    i. User and User_tests fixed and passing, driver's login now working
    ii. Other driver methods
    iii. none
  c. Selahaddin
    i. I finished the Acceptance tests for create course and create Section
    ii. I will be working on Acceptance tests for Login
    iii. No blockers
  d. Vitky

i. Tried to work on MakeMigrations, migrate (driver problem), to get to url and log in. Finished working on Views.py and Driver files to work log in.
ii. I shared acceptance tests to someone that I passed
iii. None

e. Jamie
i. Finished creating the document of our project to turn in
ii. Acceptance tests for login
iii. None

- 3. Milad got the login page working allowing us to access the rest of our program
- 4. Create acceptance tests for login(jamie and selahaddin), and get account management/view accounts
- 5.



Retrospective:

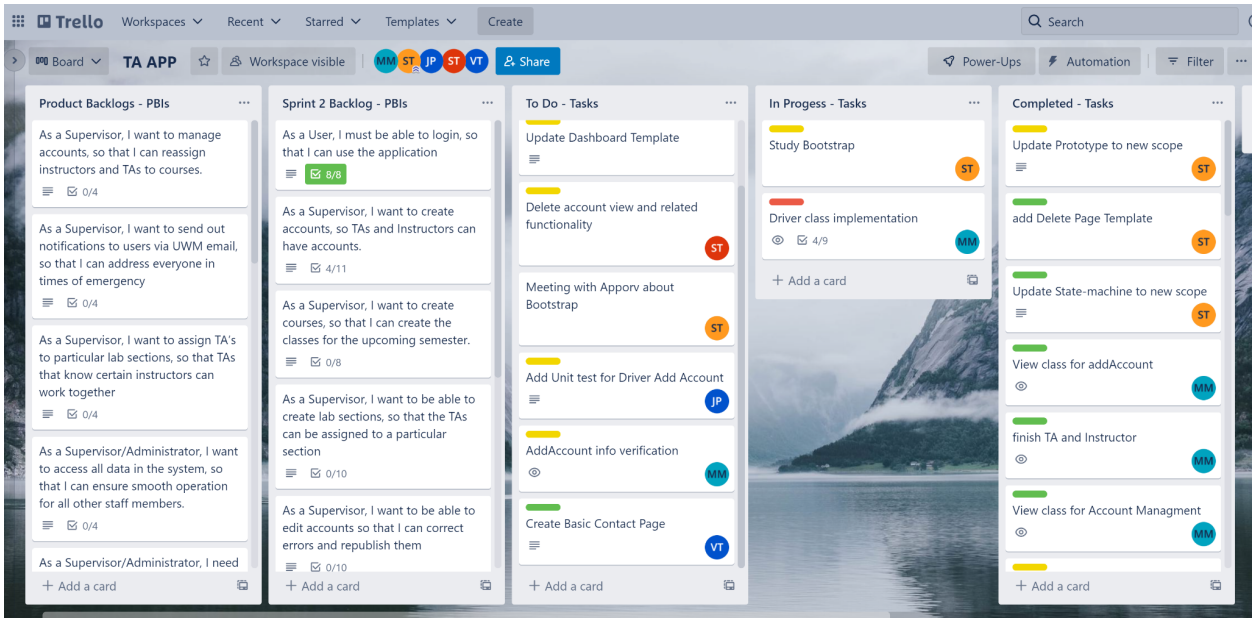
- What went well
  - Following charter documentation with how we handled github
  - Collaboration and design
  - Meeting schedule
- What went poorly
  - Time management
  - We didn't write enough tasks and manage them appropriately
  - We focused too much on the big picture instead of individual tasks
  - We didn't focus on PBI's and functionality
- What we are committed to doing better
  - Focus on individual tasks to achieve the big picture

- Work more and and have more consistency with the work
- Set deadlines and create a timeline to follow
- Set more specific tasks

Sprint 2:

4/27/2022 :

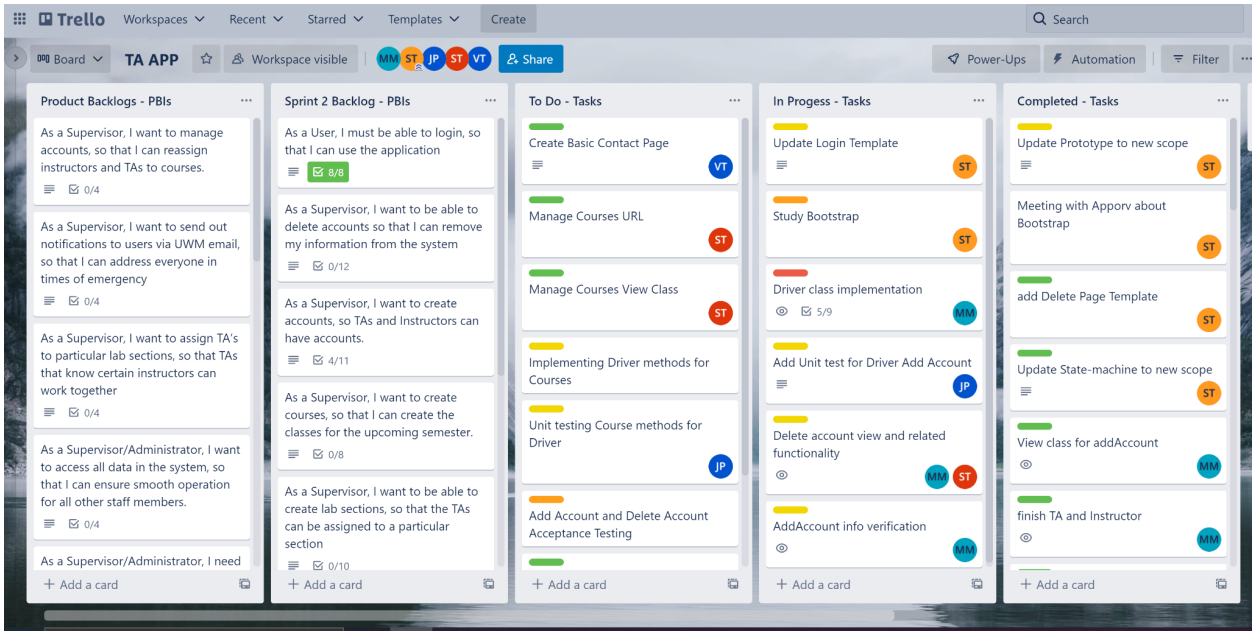
- 1. 5pm-7pm everyone was in attendance except Jamie with a valid excuse
- 2. 3: Questions:
    a. Sam
        i. Worked on url and views for Delete Account
        ii. Studying Bootstrap and Meeting with Apoorv
        iii. Waiting for Apoorv to meet
    b. Milad
        i. Add account and account management views and functionality done
        ii. Add account info verification in driver.addAccount()
        iii. Sending info through the url
    c. Selahaddin
        i. Tried working on Acceptance tests
        ii. I will be working on view file for delete account method
        iii. I Will be searching more of view.py
    d. Vitky
        i. Tried to work on views for Delete Account
        ii. I will be creating on Basic Contact Page
        iii. I will be searching more of our template
    e. Jamie
        i. Finished the document to turn in for sprint 1 and login acceptance tests
        ii. Adding Unit tests for Driver Add Account
        iii. None
- 3. Updates prototypes and state-machine, added delete page template, finished ta and instructor, view and functionality for account management and add account
- 4. Assigned all of our group members to specific tasks to finish the Delete account PBI.
- 5.



4/28/2022 :

- 1. 5pm-__pm Everyone was in attendance besides Vitky who had valid excuse
- 2. 3: Questions:
    a. Sam
        i. Added Bootstrap to the project
        ii. Update Login Template to use Bootstrap
        iii. Learning Curve for Bootstrap
    b. Milad
        i. Finished addAccount verification regex and feedback
        ii. Views class for delete account and Driver.deleteAccount(), implement views and html parts of the addAccount verification feedback
        iii. none
    c. Selahaddin
        i. I worked on deleteView.py and finished it
        ii. I will be working on Manage course url and View class
        iii. None
    d. Vitky
        i. Finished Contact Page
        ii. I will discuss with team for update or I will find the tasks for me to complete
        iii. None
    e. Jamie
        i. I worked on unit tests for adding courses
        ii. I will complete the tests for adding account
        iii. None

- 3. addAccount verification regex and feedback(milad), addAccount verification regex and feedback(sam), deleteView.py finished(Selahaddin), completed tests for logging in (Jamie)
- 4. Create test cases for add course(jamie), delete account in driver and views(milad), manage course url(selahaddin), update login to use bootstrap(sam)
- 5.



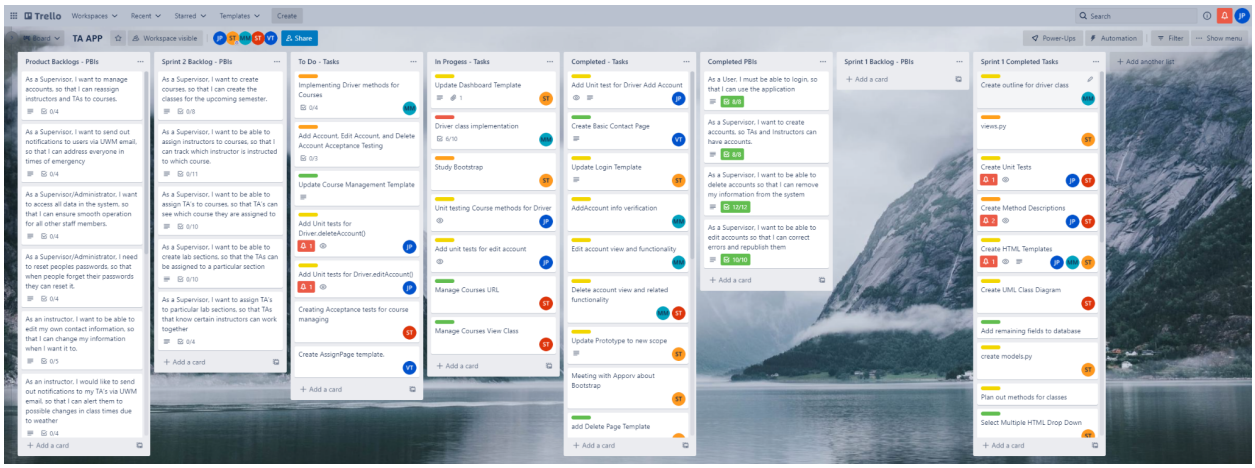
4/29/2022 :

- 1. 5pm-6pm everyone was in attendance
- 2. 3: Questions:
    a. Sam
        i. Updated Login page with bootstrap referencing prototype
        ii. Update Dashboard with bootstrap, and use logic for html view by roles
        iii. No current blockers
    b. Milad
        i. Views class for delete account and Driver.deleteAccount(), implement views and html parts of the addAccount verification feedback, views, html, and Driver.editAccount for edit account functionality, all three PBIs should be done
        ii. Driver course related methods
        iii.
    c. Selahaddin
        i. Worked on view.py and url.py for manage course
        ii. Will be working on Acceptance test for course managing
        iii. none
    d. Vitky

i. Finished ContactsPage.html to create table for Supervisor, Instructors, and TAs
ii. I will be creating new html files for Assign courses
iii. None

e. Jamie
i. Finished add account tests
ii. Creating tests cases for add course
iii. Awaiting add course completion

- 3. Add account tests done(Jamie), finished contactPage(vitky), (delete account, add account feedback, views, edit account)(milad),
- 4. Add logout for testing purposes(Sam), add unit tests editing account(Jamie), adding a back button to every page(Sam), adjusting templates for course and section management(vitky)
- 5.

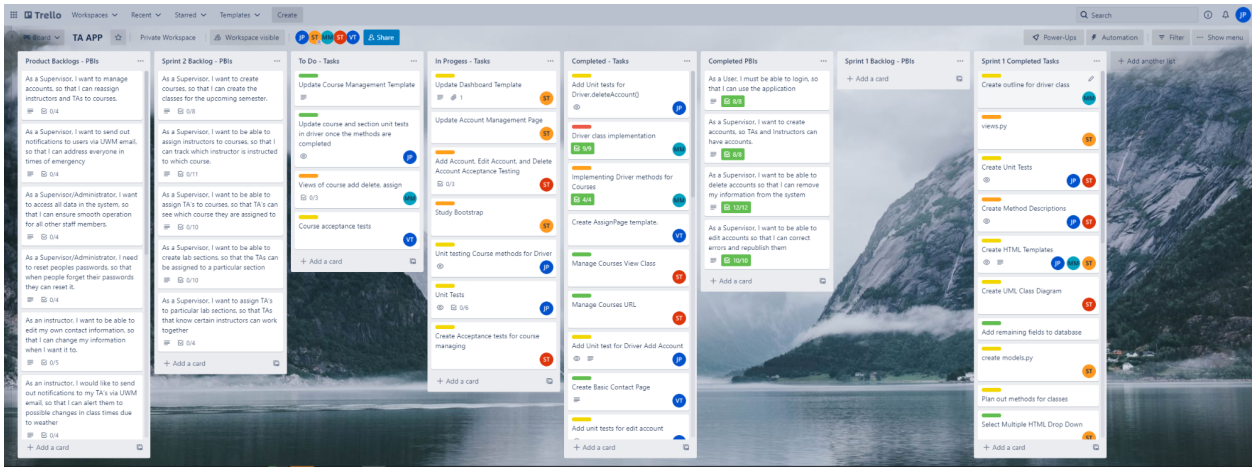


5/02/2022 :

- 1. 5pm- 5:40pm Everyone was in attendance
- 2. 3: Questions:
  a. Sam
  i. Worked on the dashboard
  ii. Will work on dashboard and Account Management
  iii. Can not currently make migragrations
  b. Milad
  i. Driver fillCourse, addCourse, deleteCourse, assignToCourse methods
  ii. Views classes for AddCourse, DeleteCourse, AssignToCourse
  iii. none
  c. Selahaddin
  i. Worked on Acceptance tests for Addaccount, editaccount and delete account
  ii. Will be working on to debug my tests and have them all pass
  iii. Should learn more about the cases for Acceptance tests

d. Vitky
    i. Finished Assign course html template.
    ii. Will work on AddCourse acceptance tests
    iii. None
e. Jamie
    i. User unit tests, course and section unit tests in driver
    ii. Work on all other unit tests
    iii. None

- 3. Driver unit tests(Jamie), Driver methods(fillCourse, addCourse, deleteCourse, assignToCourse)(milad), acceptance tests for account methods(selahaddin),
- 4. Unit tests for the rest of the methods(Jamie), work on account management(sam), acceptance tests(selahaddin), views for course(milad), acceptance tests for course(vitky)
- 5.



5/04/2022 :

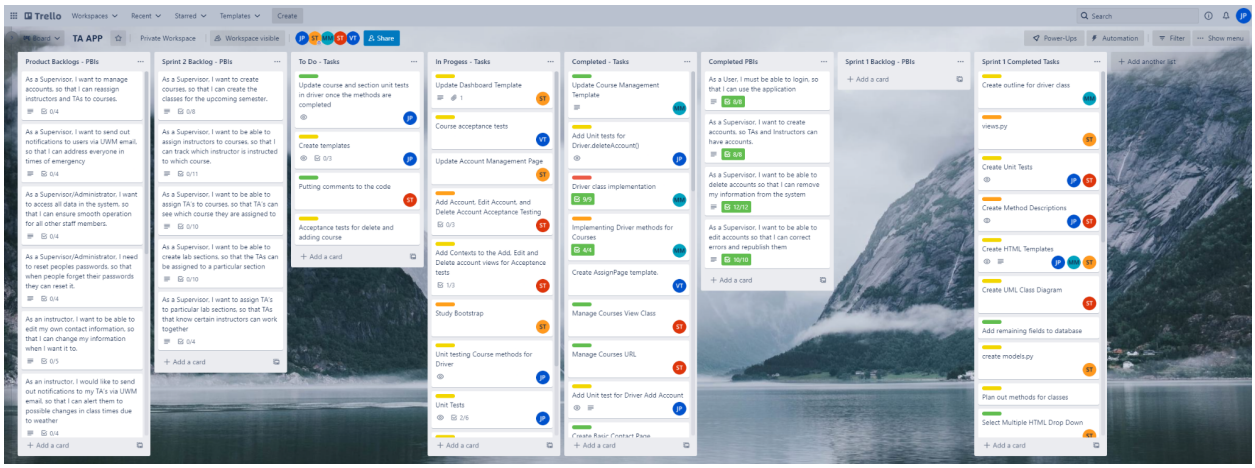
- 1. 5pm–5:30pm Jamie, Selahaddin, and milad were in attendance. Vitky had a valid excuse
- 2. 3: Questions:
    a. Sam
        i.
        ii.
        iii.
    b. Milad
        i. addCourse and manage course functionality updated models urls and some templates
        ii. Assign to course and delete course functionality
        iii.
    c. Selahaddin
        i. Worked on adding contexts to views for add, delete and edit account
        ii. Will be finishing up my current task and start adding comments to the code

iii. None

d. Vitky
   i. Finished AddCourse acceptance tests and waited for views to pass them.
   ii. Updating AddCourse acceptance test
   iii. None

e. Jamie
   i. Finished Course and section init tests.
   ii. Supervisor, instructor, and TA unit tests, creating missing templates, create missing prototypes
   iii. None

- 3. Course and section unit tests(Jamie), add account acceptance tests(Vitky), addCourse and manage courses updated in models(milad)
- 4. Created missing prototypes and templates(Jamie), start adding comments to code(selahaddin)
- 5.

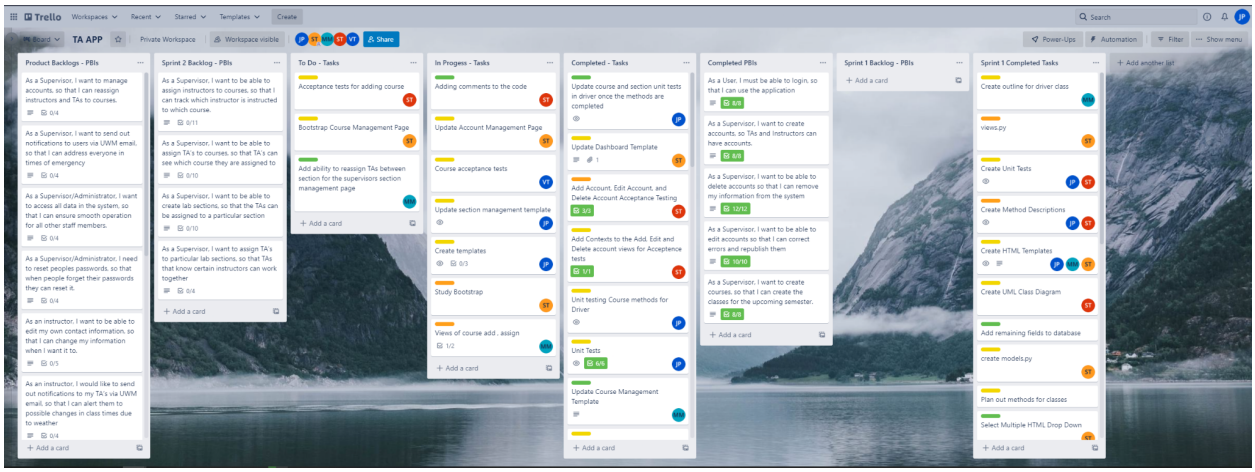


5/5/2022 :

- 1. 5pm-5:45pm Sam, Milad, Selahaddin, and Jamie were in the meeting
- 2. 3: Questions:
  a. Sam
     i. Finished Bootstrap Dashboard
     ii. Account Management Page and Course Management
     iii.
  b. Milad
     i. assignToCourse template partially redone,
     ii. assignToCourse view functionality, section management views,
     iii.
  c. Selahaddin
     i. Finished Acceptance tests for accounts
     ii. Will be working on Acceptance test for add course
     iii. none

d. Vitky
    i. Giving to Selahaddin for updating addcourse after view.
    ii. None
    iii. None
e. Jamie
    i. Finished the unit tests for users and each type of user, and the template for instructor course management
    ii. Template for TA assignment and section management
    iii. None

- 3. User unit tests and user, instructor, and Supervisor unit tests done(Jamie), Dashboard updated with bootstrap(sam), finished acceptance tests for accounts(selahaddin)
- 4. Acceptance tests for adding course(selahaddin), templates for TA assign and for Section management(Jamie), account management page (sam)
- 5.



5/9/2022 :

- 1. 5pm-5:45pm Everyone was in attendance
- 2. 3: Questions:
    a. Sam
        i. Finished Account Management
        ii. Will start course Management
        iii. No blockers
    b. Milad
        i. Finished assignToCourse template and view w/ reassign functionality
        ii. Will start assignToCourse precheck in courseManagement
        iii.
    c. Selahaddin
        i. Finished the adding comments and acceptance test for add course
        ii. Will start acceptance test for assigning instructor to Course

iii. None

d. Vitky
   i. Catched up with the group and know my next tasks.
   ii. Will work on updating ContactPage, bootstrap and view.
   iii. None

e. Jamie
   i. Working in section management and instructor course management templates and prototypes
   ii. Continue working on current tasks
   iii. Laptop had to be factory reset, still resolving problems due to that.

- 3. assignToCourse(milad), comments added(selahaddin),
